

One-page profile template

One-page profiles are an effective and easy-to-use tool for bridging the gap between school and home, and getting a detailed overview of an individual learner.

They work best when they are filled out in collaboration with the teacher, learner, their parents/carers, and any other adults who work with the child - e.g. designated TA, speech therapist etc.

How to use:

Working with an individual learner and their parent(s) or carer(s), fill out each section below to gain invaluable insight into the learner's home life, how they learn best and how you can better engage and support them going forward.
